

## **Tourist maps for young people, map analysis and principles for making maps**

### **Abstract**

The first aim of this thesis is to analyse the available maps for young people. The second aim is to design the map key and then use it to create three touristic maps for young travellers. The attachments of this thesis are maquettes of Prague, České Budějovice and Český Krumlov maps. The first part of the literature search concerns the current state of tourism in the Czech Republic and in the mentioned cities. Next it deals with the problems of young travellers and touristic maps for young people. The second part of the literature search is focused on the research methods for map assessment. The methodological part describes the procedure and results of the assessment of the chosen maps. The penultimate chapter is dedicated to the creation of map key and the principles for making maps. The discussion concerns the problematic places during making maps and choosing the appropriate content of the maps.

**Keywords:** tourist maps, young people, map assessment, map key, map creation
